

Massachusetts Crop Report: Month of May, 1895 (Classic Reprint)

Excerpt from Massachusetts Crop Report: Month of May, 1895 Bulletin No. 1, Crop Report for the month of May, is herewith presented as the opening bulletin of the season. These crop bulletins will be issued monthly, on or about the seventh day, during the growing and harvesting seasons. Arrangements have been made with the New England Weather Service whereby weekly weather-crop bulletins will be sent Tuesdays to each person on our mailing list, and also by special arrangement to the postmasters of the Commonwealth, for posting in their respective offices. The first number issued was for date of May 6. Also, as last year, a short article by a specialist of the Board of Agriculture will be included in each issue. The article in this bulletin is furnished by the veterinarian, and treats of Tuberculin. Report on Farm Animals. [Report No. 123, U. S. Department of Agriculture, Division of Statistics.] Horses. The number of horses has fallen off 187,821, or 1.17 per cent, during the past year. The heaviest losses generally occurred in the central and western States, and the greatest increases in numbers in the Southern States and in the Territories. Prices have declined in all the States and Territories except Massachusetts and Nevada, the increase in the former being \$1.10. The causes generally assigned by correspondents for the falling away in the number of horses are the substitution of other motors in the street-car service of towns and cities, and the failure of food crops and consequent inability to sustain them. The decline in value is usually attributed to the widespread depression. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst

repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
