

Rig Basics - How to Look After Your Mast, Rigging and Sails

Rig Basics - How to Look After Your Mast, Rigging and Sails written by Kim Skov-Nielsen provides a concise, informative and clearly-written outline of what an owner or operator must take into consideration when looking after the mast, rigging and sails. It is also a highly useful guide to what a surveyor should be looking at when surveying a rig. Get to know your rig - don't just assume it is up there. Inspect it often. Work out a safe system and climb the rig often. Take your camera with you and take photos instead of notes. Keep a rig log. It is not good enough to inspect the rig from the deck with binoculars - someone has to climb up. Kim Skov-Nielsen, professional yachtsman and marine surveyor
