

The Economic Transformation of China

The Economic Transformation of China is a collection of essays written by an eminent observer of the Chinese economy. The book covers the Chinese transformation beginning in the 1950s and continuing through the second decade of the twentyfirst century. It includes an analysis of the forces that held China back before 1949, the nature of the economy as it operated under the Soviet model of development, and the transformation since 1978 into a socialist market economy. The essays of the post1978 era reflect the authors view of the state of the reform effort at the time the essay was written and carries the story up to the 20122013 slowdown in economic growth.
