

Yes, Helen, There Were Dinosaurs: The Story of a Jurassic Time Trip

Yes Helen,there were Dinosaurs is the astonishing journey of a blue Volkswagen Beetle back into time to reach the Jurassic period. when the biggest dinosaurs lived in North America, 138 million years ago. What child or adult would not like to pat a Brontosaurus: know how big one was: learn what it probably ate: how to pronounce its name; and all of the many things the Uncle Homer, a scientist, his grand-niece, Helen, and Pepper the dog discovered and managed to live and return and tell about. Scientific enough to impress a scientist with enough adventure to intrigue a child or an adult.
