Excerpt from *Wheat: A Practical Discussion of the Raising, Marketing, Handling and Use of the Wheat Crop, Relating Largely to the Great Plains Region of the United States and Canada*. This little book deals largely with the wheat culture of the Great Plains region of the United States and Canada, but the writer has attempted also, to give some general information on the raising, marketing, handling and use of the wheat crop. This book is not technical but treats the subject in a practical way and is written especially for the study and use of those who are engaged in wheat farming. During my fifteen years experience in wheat farming, five years in North Dakota and ten years in Kansas, in connection with the state agricultural colleges, I have gained some special knowledge of culture methods and practice which may be of value to others who are engaged in the wheat growing business. In preparing the following pages I have also consulted other authorities on the subject and have frequently quoted from wheat books and bulletins. I wish to refer especially to *Cereals in America* by Thomas F. Hunt, and the *Book of Wheat* by Peter Tracy Dondlinger as being among the best authorities on the subject. For the illustrations shown in figures 1, 4, 6, 7, 8, 11, 12, 13, 14, 16 and 22, I am indebted to the courtesy of the Kansas experiment station and the Ft. Hays branch station.
