

In his bestselling $E=mc^2$, David Bodanis led us, with astonishing ease, through the world's most famous equation. Now, in *Electric Universe*, he illuminates the wondrous yet invisible force that permeates our universe—and introduces us to the virtuoso scientists who plumbed its secrets. For centuries, electricity was seen as little more than a curious property of certain substances that sparked when rubbed. Then, in the 1790s, Alessandro Volta began the scientific investigation that ignited an explosion of knowledge and invention. The force that once seemed inconsequential was revealed to be responsible for everything from the structure of the atom to the functioning of our brains. In harnessing its power, we have created a world of wonders—complete with roller coasters and radar, computer networks and psychopharmaceuticals. A superb storyteller, Bodanis weaves tales of romance, divine inspiration, and fraud through lucid accounts of scientific breakthroughs. The great discoverers come to life in all their brilliance and idiosyncrasy, including the visionary Michael Faraday, who struggled against the prejudices of the British class system, and Samuel Morse, a painter who, before inventing the telegraph, ran for mayor of New York City on a platform of persecuting Catholics. Here too is Alan Turing, whose dream of a marvelous thinking machine—what we know as the computer—was met with indifference, and who ended his life in despair after British authorities forced him to undergo experimental treatments to “cure” his homosexuality. From the frigid waters of the Atlantic to the streets of Hamburg during a World War II firestorm to the interior of the human body, *Electric Universe* is a mesmerizing journey of discovery by a master science writer. From the Hardcover edition.

The Stranger and the Magic Can - Raccoon Tales, Adventures of Jipple, Japple & Jepple, Die Geschichte der National-Bank 1921 Bis 2011 (German Edition), Managing Occupational Road Risk - The RoSPA Guide, Take a Hike!: Around an Amazing World, Mil a Kim: Zoologicka zahrada (Czech Edition), Oil Disasters (Worlds Worst...), Be You!
