

Since the first edition of this highly successful book the field saw many great developments both in experimental and theoretical studies of electrical properties of non-crystalline solids. It became necessary to rewrite nearly the whole book, while the aims of the second edition remained the same: to set out the theoretical concepts, to test them by comparison with experiment for a wide variety of phenomena, and to apply them to non-crystalline materials. Sir Nevill Mott shared the 1977 Nobel Prize for Physics, awarded for his research work in this field. The reissue of this book as part of the Oxford Classic Texts in the Physical Sciences is a reprint of the second edition which was published in 1979.

Building A New Heritage (RLE Tourism), 50 Schlüsselideen Management (German Edition), Cheap as Chips - Food for Cooking Idiots, Electrical Conductivity II / Elektrische Leitungsphanomene II (Handbuch der Physik Encyclopedia of Physics) (Volume 20) (German, English and French Edition), The End of Advertising as We Know It, Soil Alkali: Its Origin, Nature, and Treatment (Classic Reprint), The Past and the Present of Political Economy, How to Invest in the Future in the Stock Market, Make Long-term Money and Amaze Your Friends With Your Investment Knowledge! - All the Investing Tools, Links and Resources You Need to Profit!,
