

Fundamentals of Combustion Processes is designed as a textbook for an upper-division undergraduate and graduate level combustion course in mechanical engineering. The authors focus on the fundamental theory of combustion and provide a simplified discussion of basic combustion parameters and processes such as thermodynamics, chemical kinetics, ignition, diffusion and pre-mixed flames. The text includes exploration of applications, example exercises, suggested homework problems and videos of laboratory demonstrations

Die Rastafari-Bewegung Und Ihr Einfluss Auf Den Internationalen Tourismus in Jamaica (German Edition), Marktsegmentierung durch vertragliche Vertriebssysteme: Die Errichtung von Handelshindernissen auf privatautonomer Basis (Europäische ... Universitaires Europeennes) (German Edition), Fou De Bassan (Fr-Version): Des Images Fascinantes De La Vie Des Foux De Bassan (Calvendo Animaux) (French Edition), Bioenergy Development: Issues and Impacts for Poverty and Natural Resource Management (Agriculture and Rural Development Series), Secrets of Seduction for Women,
