

Forests (Wonders of Our World)

The Wonders of our World Series offers young readers a lively and visually exciting introduction to the world around us and the forces at work shaping our planet and its future. Ten books in this series offer fascinating full-color photographs of examples from around the world to help illustrate: -- the devastating impact volcanoes, extreme weather, and earthquakes can have-- why the earths forests and waterways are in danger of destruction-- how the earths powerful internal forces produce rocks and minerals from the ordinary to the dazzling-- how mountains, deserts, and caves are formedThe destruction of the earths forests is having a negative effect on the earths climate, its people, and wildlife. Using examples from around the world, Forests examines: -- different kinds of forests in different climates-- the layers of a forest-- plant and animal life-- people of the rainforests-- preserving forests
