

Arithmetical physics. Pt.2B; Magnetism & electricity, degree and honours stages

This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1885 Excerpt: ...be one voir. Then, by what precedes, the energy which appears in the lamp is 10 ergs per second, and this is given out partly as heat, partly as light. If the E.M.F. is high, the ratio of light to heat is great. If the E.M.F. is low, the ratio of light to heat is small Hence the economy of machines of high B.M.F. for electric lighting. t 205 is the total resistance in circuit. Exercise 8. EXERCISES. 57 Example 0.--What is the electromotive force of a single cell of a battery arranged like Daniells, but having copper chloride substituted for copper sulphate? The change which takes place is $Zn + CuCl_2 = ZnCl_2 + Cu$. Here zinc chloride is formed and copper chloride decomposed. From table Zn, Cl₂ = 4-7376x10 ergs. Less Cu, Cl₂ = 2-6292 x10¹² .-. Energy on dissolving 65 grammes of zinc)--2 1084x10² ercs in the battery 65 grammes zinc give 2-1084 x10¹² ergs. 0 0003412 gm. give x and ?=2-1084 x10^{i2x} 0-0003412/65 = 21084x34120/65 = 1-107 x10^r ergs nearly; and this work will raise one unit through a difference of potential of 1-107x10⁷, or one coulomb through a difference of potential 1107x10, but 10 = 1 volt.. electromotive force of the battery = 1107 volt. EXERCISE 8. 1. A coil of German silver wire is used as a resistance coil. The resistance of the coil is 3 ohms, and a current of 10 amperes flows through it. What radiant energy per second expressed in ergs, and also in watts, does the coil give out? 2. If the energy given out in the above coil could be used to raise a weight of 1 kilogramme at a place where $g=980$, to what height in metres would the weight be raised in one second? In other words, convert 3 x 10⁹ ergs into kilogramme metres when $g=980$. 3.

Arrange a battery of 120 cells of E. M. F. 11 and $r=3$ so as to develop the maximum e...
