

Ken Ken For Kids 4x4: 250 Easy to Medium Logic Puzzles (Ken Ken series) (Volume 1)

Features: 250 easy-to-medium kids KenKen puzzles. Big grids with lots of space for easy solving. KenKen (also known as KENKEN, KenDoku, CalcuDoku, Square Wisdom) is a mathematical and logical puzzle loosely similar to Sudoku. It was invented by a Japanese mathematics teacher Tetsuya Miyamoto. The objective is to fill the grid in with the digits 1 through N (where N is the number of rows or columns in the grid) such that: Each row contains exactly one of each digit. Each column contains exactly one of each digit. Each bold-outlined group of cells (block) contains digits which achieve the specified result using the specified mathematical operation: addition (+), subtraction (-), multiplication (×), and division (÷). Unlike Killer Sudoku, digits may repeat within a block.
