

# OCCULT ETHER PHYSICS: Teslas Ideal Flying Machine and the Conspiracy to Conceal It

Non-fiction: A re-discovery of what the author calls occult ether physics, the scientific/technical basis for a space-propulsion system invented in the late 19th century by Nikola Tesla, now used in the flying machines known as flying saucers or UFOs. This invention is concealed behind false scientific theories, space alien hoaxes, and false propaganda disseminated through a controlled mass media. A UFOlogy, new-age, paranormalist, and pseudo-debunker network is covertly maintained under national security laws, to blur the facts of reality and disjoint inquiry, thus protecting the archaic technology and resources of coercive-monopolist, corporate-state interests by default. Chapter VI is the Lyne Atomic Hydrogen Furnace, a 1964 free-energy invention of the author.
