

An introduction to the subject of dinosaurs for young children. It tells everything they want to know about these strange and amazing creatures, how they lived and what they looked like. Included are not only the favourites, such as tyrannosaurus rex, diplodocus triceratops and stegasaurus, but also dozens more less well-known species such as utahraptor and deinonychus. The drama and power of their world is brought vividly to life by the artwork of Steve Kirk, dinosaur artist, whose detailed reconstructions feature on every page.
