

## Private Sex Advice to Women

Excerpt from the Forward: In this book the writer thereof seeks to convey to women particularly to young wives and women expecting to be married certain important facts of knowledge, certain necessary information, which all such women should possess, but which few are given the opportunity to acquire. It would seem to require no argument to convince a rational individual that before a woman is capable of intelligent motherhood she should be made acquainted with the physiological processes which are involved in the sexual functions leading to the state of motherhood; but we are confronted by the fact that few young women are given such instruction.
