

How to Fix Major League Baseball: A Historical & Legal Perspective

Why do the NFL, NBA, and NHL all continue to grow, while MLB is in decline?

Why is there VAST inequity on the field, including an oligarchy of 4-5 teams that (alone) have won the World Series over 55% the time in the past 100 years? Why have the New York Yankees won the World Series 25% of the time in the past 100 years? This in-depth, hard hitting wake up call provides resolution and answers to these questions, resolving How to Grow the Pie in Major League Baseball, while addressing the underlying, fundamental fairness issues in MLB. Additionally, a distinct path forward toward parity and equity among all teams is presented, which, once implemented, would level the playing field for all teams in all markets--regardless of their market size, resulting in increased fan interest overall and increased MLB market share, relative to the other major professional sports. This law school thesis (which received an A grade after recent submission at Michigan State University law school) is a must read for any true Major League Baseball fan who is interested in obtaining a level playing field for all teams, and understanding why under the current structure, their mid or small market team rarely wins.
