

A pesar de las sucesivas crisis economicas que padecio Argentina durante largos periodos. puede hacerse mucho en funcion de recuperar terreno en todos los campos. Los economistas Hector Valle y Mercedes Marco del Pont esbozan en este libro algunas hipotesis audaces en ese camino. Sostienen. entre otros puntos. la urgencia de darle maxima prioridad al desarrollo industrial de tecnologia avanzada. Los autores no se desentienen. al mismo tiempo. de la necesidad perentoria de elevar los salarios y generar empleo. buscando no solo una reparacion socialmente justa sino un mejoramiento amplio en la eficiencia de la oferta laboral. El avance hacia una tecnologia moderna contribuiria al ahorro de capital y a restaurar una mentalidad moderna y productiva en el pais. Sin ingenuidad y con firmeza Valle y del Pont subrayan que una reforma economica es posible. siempre que exista voluntad politica de llevarla adelante. Advierten. asimismo. que la deuda externa. alentada y justificada desde siempre por la ortodoxia neoliberal. no debe continuar como el eterno cuello de botella.
