

The Little Crescent Moon and The Bright Evening Star

This fanciful story is about the Little Crescent Moon, who is sad because of its dim light and small size. It feels insignificant compared with the Bright Evening Star nearby. God counsels the Moon to prepare for Christ's coming, to be confident in its own abilities, and to honor God in its own unique way. This colorfully illustrated book is entertaining as well as educational. It teaches the valuable lesson that each of us can praise God in different ways.
