

## The Perfect Stock: How a 7000% move was set-up, started and finished in an astonishing 52 weeks

This book illustrates why most people lose in the stock market, even when tremendous opportunities are presented to them. A spectacular move of over 7000% in 52 weeks was offered to the public and still the vast majority of the public either lost money or did not make any significant gains on the stock. Only a handful of the insiders made money on the move. Written as a fiction surrounding such a stock, the book offers simple lessons to the lay person about how to improve ones odds for success in the stock market, and it does so with an entertaining and enlightening storyline. The story offers an insight into the rewarding way Wall Street works for the insiders and how it shows a different face to the outsiders.
